

**Date:** Thursday July 14, 2022

**Addendum #:** 1

**Project Name:** Climate Action Plan Subset #2

**Bid Due Date: Wednesday, July 20, 2022, at 10:00AM EST**

This addendum provides clarifications related to this RFP:

1. RFP Climate Action Plan #2 calls for completion of work by December 23, 2022. Would TCL&P accept a proposal based on a timeline that extends beyond this date, provided that deliverables are staged such as to prevent delay in completion of the IRP contemplated in the third RFP in this sequence?

**Yes, it is acceptable to have a timeline extending beyond this date as long as it does not prevent a delay in completion of the IRP.**

2. Are physical submissions required, or will email copies suffice?

**A physical submission is not required.**

3. One of the scope items is to “evaluate the potential of energy (battery, thermal, or other source) storage within the utility’s distribution system.” Is TCL&P seeking to evaluate the potential of customer or system energy storage?

**TCL&P would like to evaluate the potential of both customer and system energy storage but places more emphasis on the system energy storage. The reasoning is it is assumed the process to implement the energy storage would be streamlined due to minimizing the number of parties involved in the process.**

4. Should responders submit a weighted average hourly T&M rate or break it up by resource type?

**The submission should be by resource type as different responders may be selected for different scopes of work. If available, a discount should be disclosed if more than one scope of work is selected.**

5. We understand there was a Bid Conference Call on July 1<sup>st</sup>. Please share the recording with us at your earliest convenience

**It is attached with the email.**
